

HOW TO LOAD YOUR TEMPLE OF APSHAI APPLE DISK

SAVING CHARACTERS AND LEVELS: The disk version of the TEMPLE has two features not elsewhere documented: the ability to save characters and the ability to save levels. When you exit the dunjon, the Dunjonmaster will ask you if you want to save your character on disk. Then he will ask you if you want to save the level on disk as it currently is. Always save the level with a number higher than 4, otherwise you will write over and lose forever one of the four original dunjon levels. Next time you enter the INN, you can start up with your character from disk, rather than generating a new one or entering your old character manually. Until you have saved a character on disk from the Dunjonmaster, the INNKEEPER will be unable to read your character back. (To save characters and levels, remember to remove the write-protect tab from the disk). Saving a level takes about 4 minutes.

Minimum system configuration for this program is 48K RAM with APPLESOFT in ROM (or on a language card) and 1 disk drive. This is a 16 sector disk!!

1. Insert the disk and simply boot the system.
2. For the second and successive playings, just type "RUN". You do not need to reboot.

You may find it necessary to power down before and/or after your playing session.

THE ENCLOSED DISK IS PROTECTED FROM COPYING. YOU WILL BE UNABLE TO MAKE EXECUTABLE COPIES!!
